Facial Treatments Course

Facial Treatments Course

Medical Cosmetics – Facial Treatments Course – Advanced Techniques

Chemical Peel, High Frequency Device Treatment and Microneedling Course
Our **Medical Cosmetics Facial Treatments Course** is directed to 3 specific treatment areas: **Chemical Peel**, **Microneedling** and **High Frequency Device treatments**. This training is directed to professionals in the field of Aesthetics who want to deepen their knowledge in the area of facial cosmetics and at the same time benefit from a wider range of services for their customers. With a duration of 3 months and the possibility of being taught in your mother tongue, this training is all you need to keep up with current trends in the world of Aesthetics, as well as the current needs of customers.

School of Cosmetics

Skin Care Course | Microneedling Course | Chemical Peel Course | High Frequency Devices Course

Requirements/Target Public for Facial Treatments training:

Aesthetic and Cosmetology professionals;
Willingness to learn and to expand knowledge;
Interest in cosmetic-medicinal treatments.

Theoretical Contents of the Facial Treatments Course:

Hygiene and safety at work
Professional ethics
Anatomy and Physiology of the skin

Types of peeling (chemical peeling, microdermabrasion and crystal peeling)
Microneedling Basics
Non-invasive technique that promotes collagen formation
Identify, according to the client's needs, the best treatment with high frequency

Practical Contents of the Facial Treatments Course:

Protocols for the treatment of skin whitening
Protocol for the facial rejuvenation treatment
Protocol of cell stimulation treatments
Learning the Microneedling technique
Correct use on the face (facial, sagging skin and wrinkles)
Correct use in the body (treatment of skin flaccidity, stretch marks, keloids, androgenetic alopecia)
Know how to handle the high-frequency device correctly

Objectives of the Facial Treatments Course – Advanced Techniques:

In the program of this course will be covered 3 methods of facial treatments:

The chemical peeling will teach aesthetic procedures capable of promoting the cellular renewal, in a progressive way, stimulating the natural regeneration of tissues.
Microneedling is a percutaneous induction of collagen, it is a minimally invasive procedure that consists of the use of a device that contains micro-needles and is indicated for the treatment of stretch marks, scars, flaccidity, dyschromia, alopecia and facial rejuvenation.
The most popular and non-invasive cosmetic procedures currently performed are made with **High Frequency Devices**. Commonly used to treat the face and neck, the high frequency is used to accelerate blood circulation, stimulate glandular activity, eliminate bacteria and facilitate the penetration of active ingredients.

Conclusion of the Facial Treatments Course:

The final practical tests will be evaluated and scored by our Cosmetics Instructor. Approved students will receive a certificate from Swiss Beauty & Hair Academy with international equivalence, which guarantees the ability to practice the taught practices safely and in conformity with the standards.
